

HAS YOUR STORMWATER PLAN FALLEN THROUGH THE CRACKS?

Are you looking for a Qualified Industrial Stormwater Practitioner (QISP) to help with your stormwater compliance program? FRM can assess your unique wine or industrial operation's relationship to surrounding municipal sewer systems, water bodies and environments and help your facility comply with the Industrial General Permit. FRM can guide you through reporting, sampling and monitoring requirements and provide services customized to meet your facility's needs.

STORMWATER SERVICES PROVIDED

- QISP services for Level 1 or Level 2 Industrial General Permits
- Preparation of exceedance status reports and action plans
- Compilation of annual reports and uploading to Stormwater Multiple Application and Report Tracking System (SMARTS)
- Review and update Industrial Storm Water Pollution Prevention Plans (SWPPP)
- On-site compliance evaluations
- Guidance and documentation for visual inspections and storm event sampling
- Creation of sampling plans and sampling training for facility staff
- Development and implementation of Storm Water Best Management Practices (BMPs) with facility staff
